PROTOCOLS IN PRACTICE

NECK & DÉCOLLETÉ

NECK AND DÉCOLLETÉ TREATMENT

LE MIEUX

This customizable facial treatment targets sagging, crepey skin on the neck and décolleté.

- Step 1.** Cleanse skin with Exfoliating Cleansing Gel and rinse thoroughly. Pat dry and spritz skin lightly with Iso-Rose Hydrating Mist.
- Step 2.** Use the DNA Massage Cream and perform a 10-minute gua sha massage on the neck and décolleté, or use another preferred massage technique. Remove any excess product by patting the area with cotton gauze or soft sponges.
- Step 3.** Turn steam on and position 18" from area to be treated. Mix Hungarian Enzyme Mask and Iso-Rose Hydrating Mist and use a fan brush to apply to neck and décolleté. Steam for 7-10 minutes and remove product with soft sponges or moist towels during the last minute of steam.
- Step 4.** Mix 3-5 drops of TGF-β Booster with 1 pump StemCell EGF, blending in the palm of the hand. Gently press onto neck and décolleté.
- Step 5.** For skin that needs lifting, mix together Collagen Lifting Mask powder and Collagen Lifting Mask Activator at a 1:2 ratio. Cover eyes with cotton pads and apply paste. After 15-20 minutes, massage skin with warm water and remove mask with wet sponge. For skin that needs firming, combine molding Cryogenic Firming Mask with water at a 1:1 ratio, and cover eyes with cotton pads and apply paste. After 20 minutes, remove mask by slowly peeling from neck toward forehead and remove excess with a wet sponge or warm towel.
- Step 6.** For skin that needs lifting and firming, apply TGF-β Booster and then an even layer of Collagen Peptide Serum. For skin with deep lines, apply TGF-β Booster and then an even layer of EGF-DNA. For skin that needs a boost in overall tone and texture, apply StemCell EGF.
- Step 7.** Spritz on Iso-Rose Hydrating Mist and your choice of sunscreen spray.

PRECISION FERMETE

YON-KA PARIS

This is a lifting treatment for neck, décolleté and bust.

- Step 1.** Begin treatment with an initial two-step olfactory ritual. First, dispense and massage a small amount of Emulsion Concentree into hands and tent them over the client's nose. Next, drape a warm dampened compress infused in Phyto-Bain across the bust and décolleté. Starting at the bust apply pressure from medial to lateral while moving up towards the décolleté and remove compress.
- Step 2.** With light circular motions, apply the nourishing Lait Nettoyant Cleansing Milk to bust, décolleté and neck. Add water to emulsify and remove cleanser with a warm compress.
- Step 3.** Stimulate microcirculation by tapping dampened cotton pads steeped in pure Emulsion Concentree. Work medial to lateral starting at the bust and ending at the neck.
- Step 4.** Apply 2 full droppers of Active Micro Peel directly onto the skin and let it process for 1-2 minutes depending on skin sensitivity. Remove the professional-only peel with dampened gauze in circular motions, supporting the skin with the opposite hand. Work down on the neck, and medial to lateral on the décolleté and bust.
- Step 5.** Hydrate and tone the skin with a customized blend of Emulsion Concentree applied through the pulverized mist of a Lucas Championniere machine. Work the essential oils into the skin until fully absorbed.
