### PROCEDURE

1	<b>Cleanse</b>	3-5 min	Cleanse face with <b>Peptide Foam Cleanser</b> . Remove with moistened sponge. Pat dry.
2	<b>Exfoliate I</b>	1-2 min	Apply 2-3 drops <b>Beta Acid</b> onto gauze pad and perform 2-3 passes on face.
3	<b>Exfoliate II</b>	10-15 min	Perform dermaplaning procedure.
4	<b>Hydrate</b>	2-3 min	Mist 3-4 pumps of <b>Iso-Cell Recovery Solution</b> onto palm and gently pat onto face to calm and soothe skin irritation. <i>Option: Use Oxygen Machine to infuse <b>Iso-Cell Recovery Solution</b>.</i>
5	<b>Serum</b>	1 min	Massage 3-4 drops of <b>EGF-DNA</b> onto the face, neck, and décolleté.
6	<b>Mask</b>	15-20 min	Apply <b>Moisture Infusion Mask</b> . Remove paper-like material from mask. Spread linen mask onto face. Remove after 15-20 minutes. Do not rinse. <i>Option: Use molding mask such as <b>Oxygen Calming Mask</b> or <b>Phyto C Molding Mask</b>.</i>
7	<b>Sun Care</b>	1 min	Complete procedure by applying natural sunscreen protection.
