with services that include
micro-needling, dermaplaning,
or similar devices*

HOME CARE PRODUCTS

Daily
Iso-Cell Recovery Solution
EGF-DNA

Weekly
Bio Cell+ Mask (1-2x/wk)

- 1 Prep** Advise client to remove all jewelry (including earrings and necklaces) and place in purse or pocket so it remains in client's possession. Hair should be in a bonnet and/or headband behind the ears. Be sure all hair is pulled away from treatment area.
- 2 Cleanse I** Cleanse skin with **Phyto-Marine Cleansing Lotion** or **Peptide Foam Cleanser**. Massage lightly to remove all traces of makeup and debris. Rinse thoroughly with cool water.
- 3 Cleanse II** Do a second cleanse using **Exfoliating Cleansing Gel** or **Phyto-Nutrient Cleansing Gel** to remove all traces of oil. Rinse thoroughly with cool water and pat dry. Pay special attention to areas around hairline, ears, and neck. Use handheld fan to dry completely.
- 4 Exfoliate** Apply only 1 layer of **S2 (2%) Salicylic Peel Solution** for the base acid. *Do not allow solution to get into eyes.* Use handheld fan to dry completely. Do not rinse.
- 5 Peel** Select second peel solution based on skin condition (**AML20, GSA25, M15, or M30**). Apply 1 layer, without overlapping. *Do not allow solution to get into eyes.* Use handheld fan to dry completely.
 - Always use caution, never leaving client alone.
 - Monitor skin—an even red color is good. Be sure skin does not feel hot.
 - If any blanching or frosting begins to develop, remove peel entirely with cool water and spray **Iso-Cell Recovery Solution** liberally onto skin.
- 6 Calm** Once peel has dried, remove with cool water and soft sponges. Spray **Iso-Cell Recovery Solution** liberally onto skin.
- 7 Serum** Apply **Hyaluronic Serum** lightly to skin.
- 8 Mask** Apply **Bio Cell+ Mask** or **Moisture Infusion Mask**. Remove after 20 minutes. Apply moisturizer if needed.
- 9 Environmental Defense** Spritz skin liberally with **Skin Protective Emulsion**.
